

Residential Air Conditioning Rebates

Eldridge City Hall, Dept of Building Safety 305 N 3rd Street Eldridge Iowa, 52748

Rebates are available for installation of energy efficient central air conditioning units in residential structures. The rebates are structured so that more efficient equipment receives a higher rebate. Cooling efficiencies can be compared using a measure known as the Seasonal Energy Efficiency rating (SEER). This rating works like gas mileage in your car. The higher the rating number, the higher the efficiency and the greater the energy savings. In order to qualify for a rebate an air conditioning unit must have a SEER of 14 or higher. The rebate for efficiency levels is calculated as follows:

\$200 + (\$100 X (SEER-14.0)). Maximum rebate is \$400.

All units must be rated by the Air Conditioning and refrigeration Institute (ARI). Eligibility is limited to replacement of air conditioning units in existing homes installed after December 21, 2010. New construction is not eligible for rebates.

Complete and return the this application form to receive you equipment rebate. Applications must be submitted within 90 days of installation. Appropriate permits must be obtained from the City of Eldridge.
