Name of Iowa licensed Electrician: _____ Phone _____

Describe work. Include square footage of pool surface, if in ground, partially buried or above ground, if it is accessed by a deck.

NOTICE

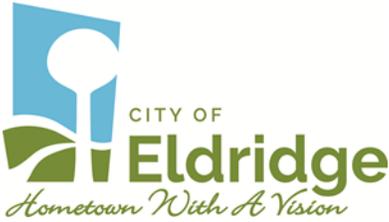

Separate Permits are required for pool and electrical. While the Dept. of Building Safety makes every attempt to be informative, the Dept. is an enforcement agency and cannot design or serve in an educational capacity. Persons doing work are responsible for providing adequate information and meeting the minimum construction code requirements. Filling the pool to a depth of 24" or more prior to final inspection shall result in a \$50 fee each for bi-weekly inspection to determine if the pool has complied with the order to empty. The issuance of a permit shall not be construed to permit or approve of a violation of any code of the City of Eldridge. Permits or approvals presuming to give authority to violate or cancel the provisions of any construction code or other ordinance of the city of Eldridge shall not be valid.

I hereby certify that I have read and examined this application and know the information is true and correct. All laws, codes and ordinances governing this work shall be complied with. I understand I am responsible for any injury or death caused by filling the pool prior to final inspection. It is the responsibility of the permit holder to request and provide access for inspections.

Signature of responsible party/person _____

Date _____

Attach the completed pool site plan. Site plans where guards, gates, alarms, bonding, grounding, wet niche, no-niche, lighting, GFI outlets and utilities are not correctly and adequately shown/described shall be denied.

DO NOT FILL THE POOL DEEPER THAN 24 INCHES PRIOR TO FINAL INSPECTION!!

Address of installation: _____

NOTE: Many people find it helpful to print an aerial photo of the yard and show the needed information there. For pools that cost less than \$1,000 and has a 25' cord factory wired into the pump, show items 1-4 and location of the GFCI outlet to be used. For all other pools, all items must be shown. You may check off each item here as you show them to help keep track:

1. Verify there are no overhead electrical lines less than 10' from the waters edge horizontally or less than 22' vertically and less no underground power lines less than 5' horizontally from the waters edge. None are present: _____
2. Verify there are no septic fields within 10' of the pool footprint. None are present: _____
3. Highlight the location of the 48" barrier. Indicate all alarms, gates, pool walls, ladders, fences etc that provide the barrier.
Complete: _____
4. Show the distance between the edges of the pool and the property lines or house. Complete: _____
5. Provide the location of pumps, heaters, filters, ladders, handrails, diving boards, wet niche fixtures, lighting. Complete: _____
6. Show the proposed path of the #8 copper providing equipotential bonding to all required components, walking surface and the water. Complete: _____
7. Show the location of all outlets within 20' of the waters edge. No outlets are allowed within 6', one outlet is required between 6' and 20'. Complete: _____

Attach aerial photo with all above information or create the site plan in the space below.
